Professional Summary

Software Engineer with a **Bachelor of Science degree in Software Engineering** and practical experience in web development, application and systems development, database management, technical support and ICT troubleshooting. Proficient in developing database-driven web applications and software solutions using PHP, Python, Java, JavaScript, HTML, CSS and MySQL.

Experienced in system design, relational database development, user authentication, CRUD-based applications, responsive web interfaces, software testing, troubleshooting, Git/GitHub and technical documentation. Practical ICT exposure includes computer maintenance, software installation and troubleshooting, networking fundamentals, cable crimping, router communication and configuration, and end-user technical support.

Demonstrates strong analytical and problem-solving abilities with an interest in web portals, institutional information systems, APIs, systems integration, workflow automation, cybersecurity awareness, accessibility, digital transformation and emerging technologies. A continuous learner who works effectively independently and collaboratively and is committed to developing reliable, secure and user-focused technology solutions.

Professional Experience

04/2024 – 06/2024
Kakamega

Masinde Muliro University of Science and Technology (MMUST)

ICT / Networking Intern (3 months)

- Assisted in designing, developing, and testing web-based applications.
- Wrote and maintained code using Python, PHP, JavaScript, HTML, and CSS.
- Collaborated with developers and other team members throughout the software development lifecycle.
- Assisted with software and hardware-related technical tasks.
- Developed practical problem-solving and troubleshooting skills.
- Provided technical support and assistance in diagnosing and resolving computer hardware and software-related issues.

Education

2020 – 2025

Bachelor of Science in Software Engineering

University of Eastern Africa, Baraton

Graduated: 2025 Relevant areas include:

- Software Engineering.
- Programming
- Computer Networks.

2016 – 2019

Kenya Certificate of Secondary Education

Kimili Boys High School.

B+

2015

Kenya Certificate of Primary Education.

Isanjiro Primary School.

359 Marks

Technical Skills

Programming

- Python, JavaScript, PHP, Java, C++

Frameworks/Tools

- React, Django, Laravel, Flutter

Technical Support

- Hardware Repair, Software Installation, System Troubleshooting

Web Development

- HTML5, CSS3, JavaScript

Software Development

- Web Application Development
- Software & Systems Development
- Backend & API Development
- Database Development & Management

Other

- Machine Learning Model Development

Databases

- MySQL
- PostgreSQL
- MariaDB

Networking

- Network Configuration, Troubleshooting, Internet Connectivity

Certifications & Training

Legacy Responsive Web Design.

Additional online training in software development and web technologies.

Additional Experience

- Experience working with databases, including data organization, queries, and basic database management.
- Experience in developing and testing web-based applications.
- Great experience in integrating frontend interfaces with backend systems and databases.
- Experience working with and training AI models.
- Comfortable working independently in remote environments and onsite.
- Strong attention to detail and ability to identify errors and inconsistencies.
- Experience following detailed task instructions and meeting submission deadlines.

Projects

Switor Fashion — E-Commerce Web Application

Web Development Project

- Designed and developed an e-commerce website for a fashion business.
- Implemented user registration and account functionality.
- Developed shopping cart functionality and database integration.
- Worked with PHP, MySQL, HTML, CSS, and JavaScript.
- Designed responsive interfaces for improved usability across devices.
- Used XAMPP and VS Code during development and testing.

Student Management System

- Designed and developed a database-driven student management application.
- Implemented functionality for managing student records and institutional data.
- Applied CRUD operations, database design, user interface development and backend programming.
- Used Git and GitHub for version control and project management.
- Applied software testing, debugging and maintenance practices.

Personal Software Development Portfolio

- Maintain a GitHub portfolio demonstrating software development projects and continuous technical learning.
- Apply Git/GitHub version control, debugging, documentation and iterative software development practices.

Library Management System

- Developed a web-based system for managing library-related records and operations.

- Implemented database-driven functionality and user interaction features.
- Applied relational database concepts, backend development and responsive web interface principles.
- Practiced system design, data validation, troubleshooting and application maintenance.

HighTech WiFi Payment & Management System

- Designed and developed a web-based WiFi management system for customers, packages, orders and payments.
- Integrated M-Pesa Daraja API functionality for mobile payment processing.
- Implemented authentication, package management, customer management and administrative controls.
- Designed and managed relational databases for customers, payments, packages and transactions.
- Applied responsive design, debugging, testing and Git/GitHub version control.

Inventory Management System

- Designed and developed a database-driven inventory management application.
- Implemented product management, stock tracking, inventory valuation and CRUD functionality.
- Designed relational database structures for efficient inventory data management.
- Implemented user authentication and dashboard functionality for system administration.
- Applied responsive UI design, testing, debugging and Git/GitHub version control.

Professional Strengths

- | | |
|--------------------|-----------------------------|
| • Problem solving | • Attention to detail |
| • Fast learner | • Team collaboration |
| • Results-Oriented | • Technical troubleshooting |
| • Communication | • Adaptability |
| • Time management | |
